RING SIZING GUIDE

PRINTING GUIDELINES

To ensure that you get the most accurate result possible, please print on standard A4 paper and make sure your page scaling is set to 'None' in the printing settings.

To verify that the Ring Sizing Guide has been printed correctly, please make certain that the below bar measures exactly 5cm.

HOW TO USE THE NIQUESA RING SIZE GUIDE

Simply select a ring that perfectly fits the intended finger on which you would like to wear your Niquesa jewel. Place the ring over the circles, until you find the circle that matches the size of the inside of the ring best.

If the circle runs over the inner edge of the ring, please choose a smaller size.

If there is a gap between the circle and the inner edge of the ring, please choose a larger size.

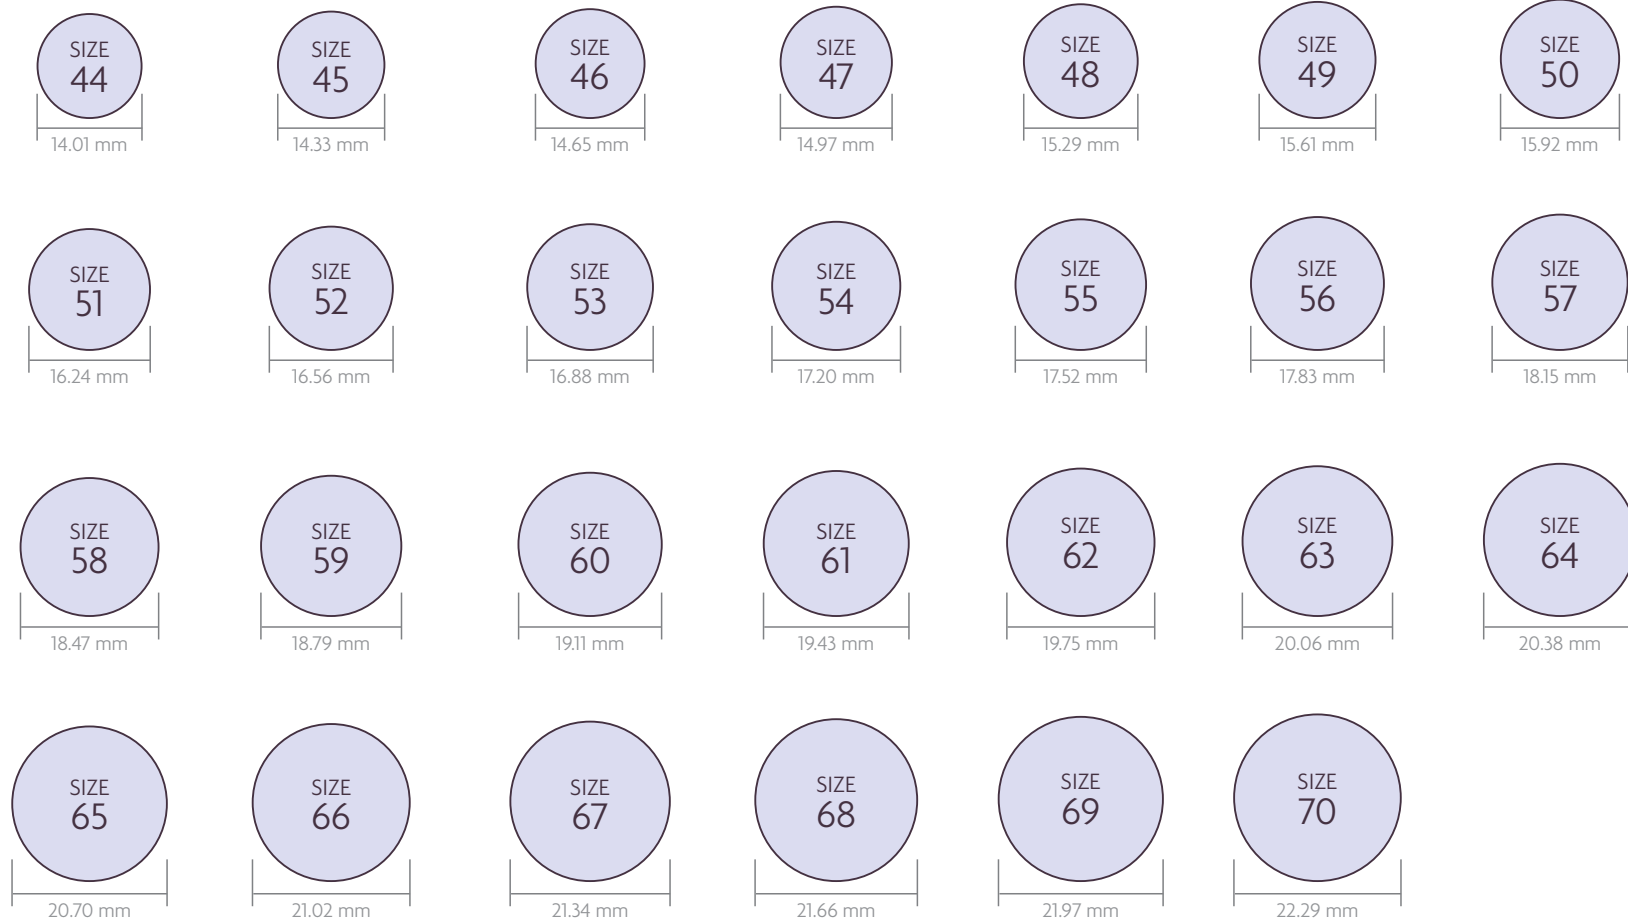

If the circle perfectly aligns with the inner edge of the ring, you have found the correct size.
